## Description

Fascinated by audio-visual worlds singer and performer Mona Mur expanded her musical activities towards music programming and production as well as sound design creating a unique style of eerie and haunting electronic music and Sound FX for game titles such as "Kane & Lynch 2: Dog Days" (EIDOS/SQUARE ENIX), "Velvet assassin" (SoftPeak/UbiSoft Japan) or the all time classic "Ballance" (ATARI USA/Japan). For her groundbreaking work on "Kane & Lynch 2" she was invited to GDC San Francisco 2012, EA DICE, Stockholm, MIGS Montreal, HTW University of Applied Sciences Berlin and GAMESWEEK Berlin. Recent works include THE FERMI PARADOX by ANOMALY Games, funded by German Ministry of Culture and WINGS Development. The Fermi Paradox is a choice-driven sci-fi narrative strategy game in which your decisions in one corner of the galaxy can upend entire civilizations in another. As a "Galactic Gardener", you will guide species through millennia and help them explore the vastness of space, make contact and, perhaps, create harmony. The Original Electronic Ambient Soundtrack created by MONA MUR playfully follows the evolutionary steps of developing civilizations and their spiritual, technological, and energetic trajectories.
